

PET PILLER

Dee Veterinary Products Pet Pillers are an easy-to-use dosing instrument that allows for the quick and safe administering of medications. Each piller is 7.5 inches long allowing you to place the medication deep in the animal's mouth where they are less likely to expel it. The medication is held by a soft rubber tip that keeps it firmly in place without causing any risk to the animal.

ITEM #	DESCRIPTION	QTY	COLORS	LENGTH (in)
